## Cataract surgery at OKKO Eye Specialist Centre

- ✔ Utmost care and precision
- ✔ State-of-the-art facilities
- ✔ Highly trained specialists
- ✔ Tailored cataract surgery options

MOUNT GRAVATT & AUCHENFLOWER

# Meet our doctors

**DR NICK TOALSTER**  
SPECIALIST OPHTHALMIC SURGEON

Dr Nick Toalster is a specialist ophthalmologist with advanced training in cataract, corneal and glaucoma microsurgeries. As both an optometrist and an ophthalmologist, Dr Toalster is particularly well placed to lead the emerging field of eye disease management.

**DR DELIA WANG**  
SPECIALIST OPHTHALMIC SURGEON

Dr Delia Wang is a specialist ophthalmologist with subspecialty training in oculoplastics, medical retina, and ophthalmic cataract microsurgery. Dr Wang is passionate about providing personalised, top-tier care, and offers treatments for a range of ophthalmic conditions. Fluent in Mandarin and Cantonese, Dr Wang is committed to making healthcare accessible to a diverse patient base.

**DR. MATTHEW RUSSELL**  
SPECIALIST OPHTHALMIC SURGEON

Dr Matthew Russell is a specialist ophthalmic microsurgeon, internationally trained retinal surgeon, medical retinal diseases specialist, and cataract surgeon. With a career that spans over 15 years, Dr Russell has mastered the ability to achieve precise results with the aim of helping patients regain their confidence and youthful energy.

**DR EVE HSING**  
SPECIALIST OPHTHALMIC SURGEON

Dr Eve Hsing is a comprehensive Ophthalmologist specialising in medical retinal conditions including macular degeneration, diabetic eye disease and vascular occlusion, as well as general eye conditions such as cataracts and pterygium surgery.

EXPERIENCE THE OKKO DIFFERENCE:

## Tailored cataract surgery options

Our surgeons don't believe in a one-size-fits-all approach to cataract surgery. That's why they offer different types of cataract surgery, to best suit your needs and lifestyle.

- 🕒 Unhurried consultations
- 💡 Innovative techniques
- 👤 Life-changing results
- 👥 Expert team
- ♿ Accessible facilities
- 💰 Transparent pricing
- 🕒 Flexible aftercare
- 🚗 Free onsite parking

### STANDARD CATARACT SURGERY

Your surgeon will remove your cataract and insert an intraocular lens (IOL), restoring clarity to your vision. This IOL provides single-focus vision, which can enhance your daily activities by improving your ability to see clearly at a distance. While glasses will still be required for mid-range tasks, such as computer work, and for near vision, Standard Cataract Surgery may be the best option for some patients, ensuring they achieve the best possible visual outcomes for their needs.

**Prices range from:**

Insured Patients from \$69.80\*,  
Insured Pensioner from \$56.10\*  
Uninsured Patients from \$1669.80\*,  
Uninsured Pensioner from \$1,356.10\*

### LIFESTYLE CATARACT SURGERY

Your surgeon removes your cataract and inserts an intraocular lens (IOL) that provides a broader range of vision compared to Standard Cataract Surgery. Many patients experience improved long-distance and mid-range vision with less reliance on glasses, which can enhance everyday activities like driving, watching TV, and using digital devices. While glasses may still be needed for near vision or extended mid-range tasks, this option can offer greater visual freedom, potentially leading to a more active and independent lifestyle.

**Prices range from:**

Insured Patients from \$569.80\*,  
Insured Pensioner from \$556.10\*  
Uninsured Patients from \$2069.80\*,  
Uninsured Pensioner from \$1,756.10\*

### REFRACTIVE CATARACT SURGERY

Your surgeon removes your cataract and inserts an intraocular lens (IOL) that aims to eliminate your need for glasses completely. Sometimes, further refractive enhancement procedures are required at a later date to achieve this goal. Refractive surgery provides an option for complete visual freedom, significantly enhancing your lifestyle. By reducing or even eliminating the need for glasses, you can enjoy greater convenience and flexibility in daily activities, such as driving, reading, and using digital devices. This can lead to a more active, independent lifestyle, freeing you from the constant need for corrective lenses.

**Prices range from:**

Insured Patients from \$3069.80\*,  
Insured Pensioner from \$3056.10\*  
Uninsured Patients from \$3069.80\*,  
Uninsured Pensioner from \$3056.10\*

These fees do not include the theatre fee or your anaesthetist's fee. You will need to confirm those fees before your procedure. \*Prices are subject to change
